

## **My Canadian Pharmacy Prices**

My Canadian Pharmacy is a convenient online drug store selling rare and common medicines online. Using the services of our company, you can buy various goods for beauty and health, as well as medicines at the lowest prices. At the same time, it is not necessary to have discount coupons and know secret promotional codes - we always offer the lowest prices and favorable conditions.

### **Why are our prices lower than in retail stores?**

Due to the fact that drugs are sold on the Internet, our online pharmacy reduces personnel and rental costs, and this has a positive effect on the cost of drugs. We do not spend on the staff of pharmacists, premises, electricity and equipment. So it's much more maintain an online store than a large premise with glass windows and mosaic floors on the central streets of the city.

We purchase drugs in very large quantities since we are confident that the goods are not stale in warehouses. This allows us to receive special conditions from suppliers and buy drugs at the lowest price. We make a profit not at the expense of high prices but at the expense of huge turnover.

Besides, you can save a lot on your meds when buying them in our online pharmacy because we are specializing in the sale of generic drugs - pharmaceutical products that have the same action, composition, and mode of application as their brand-name counterparts. When you buy a generic medication, you get the same quality product and save a lot!

A well-developed procurement and logistics scheme also saves money, which affects the final cost.

Bear in mind that the difference in price does not exceed 40%. Avoid online stores that offer bigger discounts - if the cost of the drug is significantly lower than in other online pharmacies, then the drug is likely to be a fake or it has already expired.

Pricing policy makes drugs from My Canadian Pharmacy affordable for most people all over the world. We are constantly working to make our products as accessible as possible!
